UltraTect™ SAFETY EYEWEAR

UltraTect protective eyewear is made for the modern dental environment. The high-quality, lightweight frames and polycarbonate lenses are both comfortable and durable, and they meet ANSI and CE safety standards for protection against impact injuries and chemical exposure. Clinicians, assistants, and patients all benefit from the safety and comfort of UltraTect eyewear.

- Soft temple tips eliminate local pressure
- Floating lens technology allows self-adaptation to the face
- The patented cushioned frame provides all-day comfort and allows air to circulate
- Ultra-light polycarbonate lens offers high optical properties and superior resistance against scratching and fogging
- Wrap-around lens design provides extra coverage around the eyes
- Hydrophobic and antireflective coating helps maintain visual acuity
- Glasses are flexible and impact resistant for the ultimate durability

Orange lenses protect against blue light generated by the VALO™ curing light.
